WARNING

1. Please do not plug the fan into an outlet other than 100-120V, 50-60Hz in case of damages to the built-in motor.
2. Do not put fingers or other objects into the grilles.
3. Unplug the cord before maintenance.
4. Prior to the maintenance, loose the screws of the front grilles and disassemble the grilles by rotating them counter-clockwise. Then you move on and clean up the fan.
5. Do not use water and other liquids to rinse the fan. Gasoline and other corrosive solutions are forbidden during the maintenance. Use soft cloth with neutral detergent only to clean the fan.
6. Wait until the fan is completely dry to plug it in for use.
7. If you do not use the fan for long terms, store the fan in a cool, dry place after unplugging the cord.
