INSTRUCTIONS

※ Please use a portable battery pack with 2A or 2.4A USB output to power up this vest. ※

1. Unzip the inner pocket and take out the USB cable.
2. Insert the USB cable to the port of a portable battery charger. The thermal switch will cycle through red, blue, and green light.
3. Press and hold the thermal switch for 2 seconds and it will flash red light. This means the vest enters the Auto Heating Mode.
4. In Auto Heating Mode, the vest will change to medium heat (the thermal switch will turn blue) after the red light flashes for 5 minutes. After operating for 150 minutes, the vest will shut off automatically.
5. Besides the Auto Heating Mode, you can short press the thermal switch to switch heat settings as well. The red light stands for high heat. The blue light indicates medium heat and the green light signals low heat.
6. Press and hold the thermal switch for 2 seconds again to stop the vest from heating.
