

# Dr. Prepare

Dear Customer,

Thank you for purchasing Dr. Prepare Outdoor Shower Bag. This lightweight and portable outdoor shower bag is foldable and takes up little space of your backpacks. It comes with large capacity and stable water pressure, allowing you to enjoy a cool shower for 5-7 minutes. Meanwhile, your handy shower bag can be used to wash your car, bath your pets, or even water plants in the garden as well.

Please read this user manual carefully and follow listed instructions for better shower experience in your camping trips.

## SPECIFICATIONS

Capacity	25 L / 6.6 gallons
Material	waterproof PVC
Size	18.1 x 7.9 inch
Net weight	1.89lb

## PARTS

## OPERATIONS

1. Connect the foot pump to the shower bag through the air inlet. Then connect the water hose to the water outlet of the shower bag at its bottom.

2. Prior to the use, please open the lid of the foot pump on the top and shut off the lid at its bottom.

3. Open the lid of water inlet at the top of the shower bag, fill the bag with water (around 50%-75%), and close the lid.

4. Step on the foot pump and pump air into the shower bag until the shower bag is fully inflated.

5. Press the nozzle gently to spray water.

6. If water pressure goes down, please pump the shower bag again.

## WARNINGS

1. Please use the shower bag on flat ground and keep it away from high temperature and rough ground.
2. Please grab the strap and hold the fully-filled shower bag from the bottom simultaneously when you try to move the shower bag around, in case the strap will break due to overweight.
3. Please drain the water in the shower bag before storage. Otherwise, the shower bag may leak water.
4. Do not fill the shower bag with hot water that is over 122°F. Keep the shower bag away from sharp objects.
5. If the shower bag is overinflated, water may keep flowing from the lid on the top of the foot pump. Please do not worry and close the lid to prevent water from flowing out.
